

Easy Laboratory Animal Management

FLEXIBLE | INTUITIVE | SECURE

Comprehensive and easy to use, enos is a lab animal management system that is easily customized to match your facility and optimize your processes and procedures.

Increase engagement and boost productivity by empowering your team to do almost anything with a couple of clicks. Save time and costs by aligning the adaptable software with the evolving needs of your facility - without involving the IT team or external consultants.

Whether you select our secure in cloud or on-premise solution, enos reliably delivers a consistent, unified experience across all devices.

enos
intuitive animal research software

Comprehensive Information At Hand

enos enables easy tracking and management of animals, activities, protocols, staff, skills, drugs, equipment, stock and much more, with information at your fingertips.

Adjust software to suit the role and profiles of individual team members including facility managers, investigators, veterinarians and technicians.

Dashboard

Present key metrics and specific data for facilitating effective and informed decisions. Automatically send alerts and report cases based on user-customized queries.

Animals

View multi-species animal data instantly to see stock in/out, activities, alerts, veterinary care, queries, mating, procurement, status, genotyping, breeding and more.

Activities

Track user-defined activities and animal data through your own e-forms, report animal health issues, add and annotate visual records, and record any study results.

Staff

Give team members secure access to information required for their individual roles and profiles within assigned workspaces.

Skills & Training

Build a comprehensive skills portfolio for every team member to identify authority, responsibility and any validity period.

Protocols

Track protocol license, animal & procedural approvals for best practices according to 3Rs and animal wellbeing.

Drugs & Medication

Use enos with a barcode scanner to accurately and automatically manage your drug stocks.

Labels

Design any custom labels associated to cage, animal, location, etc for your facility to assist staff and maximize efficiencies.

Data Mining

Create queries to extract specific data for yourself or share it with others in your library.

Invoicing

View invoicing/billing data.

Stocks

Efficiently manage inventory of cages, drugs, animals, consumables and feed.

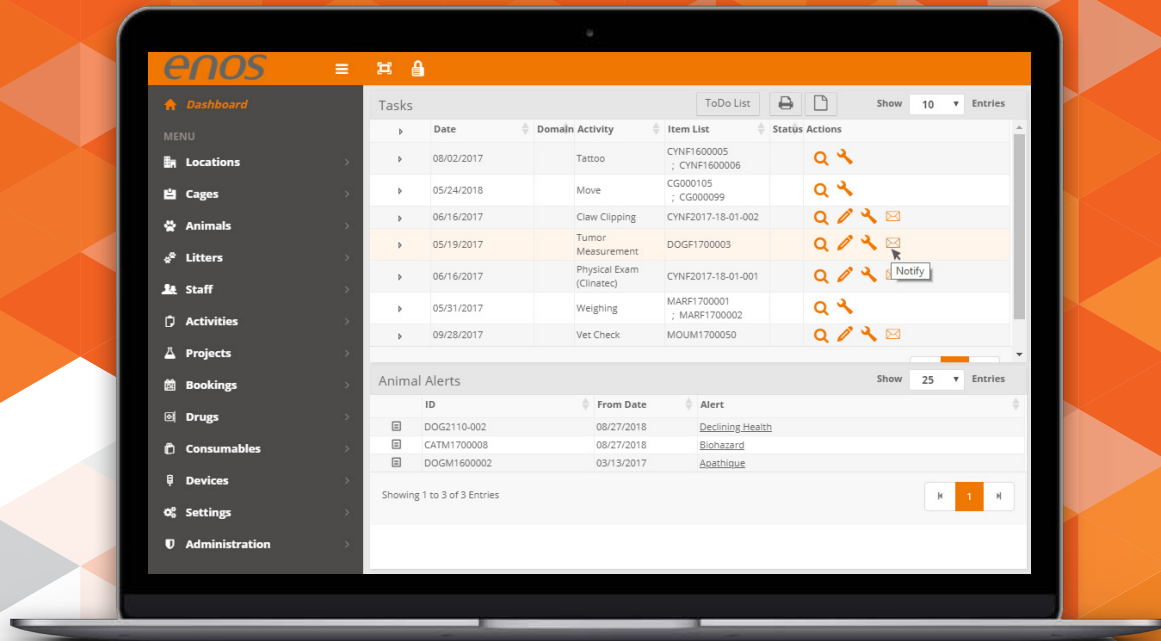

Facilities

Set up and customize your facility locations (buildings, floors, rooms, racks and rack locations) to exactly match your current configuration. Adjustable with evolving needs.

Bookings

Reserve rooms or equipment using an integrated shared calendar.

Why enos?

In cloud or on-premise

- Choose the secure delivery model that meets your needs and your internal IT policies
- Easy migration from on-premise to in cloud solutions (or vice versa)

Customizable for increased efficiency

- Adaptable to your facility work processes and procedures – rather than making you conform to rigid software requirements
- Customizable activities and e-forms to track animal data for effective data management
- Enables use of your own naming conventions for locations, animals, supplies etc. ensuring operational consistency and reduced errors
- Easily define data mining queries to uncover insights without having to rely on IT or expensive external consultants

Stay connected while on the move

- Use enos anytime, anywhere on any device

Fast access to information

- Easy to navigate. Do or see almost anything in enos with a couple of clicks.
- Easy audit trail

Easy monitoring of animals and costs

- Generate reports, views and statistics to monitor facility animals and activities
- View invoices for your internal and external customers and projects

Regulatory compliance for valid research

- Conforms with the principles of GLP, complies with 21 CFR-part 11 and 2010/63/EU to ensure valid research data and facilitate continuous improvements in animal welfare

Integration with leading industry solutions

- Seamless integration with solutions from providers including TransnetYX, Mettler Toledo, Sartorius, Techniplast and Plexx

Confidence that your data is secure

Whether you are hosting enos on-premises or in cloud, security is essential. We use best-in-class solutions for data privacy and data protection.

- Our on-premise solution is fully compatible (and interchangeable) with the top 3 database management software systems: MySQL, SQL Server and Oracle.

- Our in cloud solution is secured and encrypted by industry leader Microsoft Azure. Azure offers reliable data recovery in the event of a disaster, rapid detection and response to threats, as well as protection of data in transit and at rest.

About BSI

BSI Software is a software developer with more than 30 years experience in building quality solutions for highly regulated, highly secure industries including Defense, Biosciences and Healthcare. Since we developed enos animal management software over 10 years ago, it has been installed by some of the world's top research centers.

User-centered design

From the start, BSI has focused on the end-user experience for products and services. We take pride in meeting our customers' needs, delivering high quality products and tailor-made services. This has ensured strong customer retention and loyalty worldwide.

Flexibility to evolve

We have chosen the chameleon as our enos logo because we offer an adaptable solution. As your needs grow and evolve, enos software has the flexibility and depth to grow with you.

Continuous innovation

We invest 15% of our revenue on Research and Development annually, reflecting our on-going commitment to providing our customers with the latest cutting-edge software and technology needed to streamline facilities and vivariums.

Easy installation

Our experts will help to design, set up and optimize enos for your facility, as well as provide training and support. We believe that high quality customer service helps to create customer loyalty and trust.

Global support

We are passionate about providing excellent customer service and support. With offices and distributors located in Europe, North America and Asia Pacific, we offer fast responses and multilingual capabilities to ensure a positive end-to-end customer experience.
